FAIRFAX VA 22033-1717

April 9, 2020

Zackary E Sanders  
7850 Westmont Ln  
McLean VA 22102-1452

Dear Sir or Madam:

Zackary E Sanders has recurrent optic neuritis, and possible MS -- conditions that place him in a high risk category for COVID-19 infection (per the National MS Society). This individual must follow extra precautions compared to the general population of his age -- including isolation from others, wearing a mask at all times. I am concerned that time in jail is an environment that facilitates transmission of COVID, and I encourage recognition of his medical state in considering his legal issues and disposition.

Please contact me with any questions.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Rahul Dave', is written over a light blue horizontal line.

Rahul Dave, MD PHD  
Director, Neuroimmunology & MS Center  
Inova Neurosciences Institute  
VCU College of Medicine (Fairfax campus)
